**Waste electrical and electronic  
equipment treatment**

Adam Boleček, director

equipment waste. These acquired raw materials are returned back into the production process. By doing this we are saving natural resources and protecting our environment.

The company is registered in the Trnava Business Register, as Ltd., no.11828/T. We have been in the recycling business since 1993, originally as part of BOST Ltd. and since 2000 as a separate company BOMAT Ltd. We are one of the oldest firms in the Slovak market operating in the recycling of electronic waste. We have created a successful, stable and growing business and are one of the main processors of dangerous and other electrical equipment waste in Slovakia.

Electronic waste is collected mainly from West Slovakia. We have business partners throughout the Slovak Republic. BOMAT Ltd. also cooperates with partners from the Czech Republic, Poland, Austria and Germany. We collect waste from both the private and public sectors. The high standards of our WEEE treatment fulfill very strict rules given by the legislation of the Slovak Republic and the European Union. Our company provides a complete service in the complex electronic waste recycling process – collection, transporting and treatment.

BOMAT Ltd. based in Velke Orviste is a recycling company authorised by the Ministry of the Environment of the Slovak Republic to treat electrical and electronic waste (WEEE) issue no. 149/A/06-4.2. We specialize in modern trends of recovery of WEEE in accordance with the Law on Waste no. 223/2001 Z. z. of the Slovak Republic and the Directive no. 2002/96/EC of the European Parliament and the Council on electrical and electronic
